

BRAND GUIDE

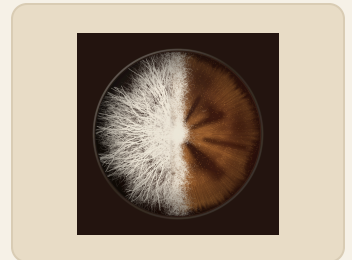

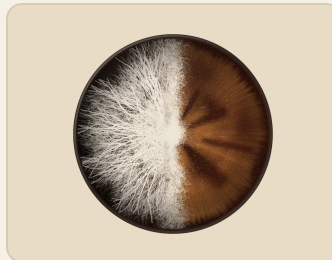

SporeDesk

CULTIVATED · TRACKED

The mark is one petri dish telling the whole grow. On the left, a colony run edge to edge: thick, aged growth at the transfer, rhizomorphs fanning out, a cottony leading edge. On the right, the spore print it ends as, heavy in places and dusted in others. Down the middle, a tomentose sector ties the two together. Culture to print, start to finish.

LOGO VERSIONS

Use the horizontal lockup by default and the stacked one when space is square or tall. The plate on its own works for avatars, stickers and anywhere the name already appears nearby. "For light backgrounds" files have dark type; "for dark backgrounds" files have cream type. Never swap them.

CLEAR SPACE AND SIZE

Keep empty space around the logo at least a quarter of the plate's width on every side. Don't use the full plate below 64 px or about 0.6 in. It's too detailed to read. Below that, use the tiny-size mark, which exists only for favicons and 16-48 px icons.

DON'T

Don't recolor the plate, stretch or squash it, rotate it, crop it inside a lockup, add shadows or outlines, or put it on a busy photo. Don't retype the wordmark in another font; use the files, where the type is already converted to shapes.

COLOR

Field Notebook palette

Warm paper, ink-brown text, rust and amber accents. Text pairings below all pass WCAG AA contrast. Amber is too light to use as text or thin lines on the paper colors. Use it as a fill, or as text on Ink.

#241811	#6B2717	#D6934A	#EDE3D0	#F6F1E7
Ink RGB 36 24 17 Text on light. Dark tiles and backgrounds.	Reishi RGB 107 39 23 Tagline, secondary text and links on light.	Amber RGB 214 147 74 Fills and buttons. Text on Ink only.	Parchment RGB 237 227 208 Cards and panels. Text on Ink.	Paper RGB 246 241 231 Page background.

COLORS INSIDE THE PLATE ARTWORK

#1A120D	#4A1F13	#C8813F	#EFE7D8
Agar RGB 26 18 13 Plate ground, left side.	Agar, warm RGB 74 31 19 Plate ground, right side.	Spore RGB 200 129 63 Spore deposit.	Mycelium RGB 239 231 216 Colony and fluff.

TYPE

Libre Caslon Display

The wordmark and big headlines. Use it only at 20 pt and up, since it gets spindly when small.

IBM Plex Mono

The tagline, labels, data and small text. Set labels in caps, spaced out, like the tagline. Both fonts are free from Google Fonts under the SIL Open Font License.

FILES

01 Logo: master artwork, lockups, wordmarks, tiny mark. 02 Icons: app, favicon, Windows, link preview. 03 Social: avatars, covers, posts. 04 Print: business card, stickers, this guide.
